ANDpSi104EA5S-HB

10.4” XGA Color p-Si TFT LCD Module

The ANDpSi104EA5S-HB is 1024 x 768 Color TFT display that utilizes new poly-silicon (p-Si) technology to provide a brighter, thinner and lighter display with high-resolution. The p-Si TFT technology allows the row and column LCD drivers to be fabricated directly on the LCD glass. This eliminates the need for discrete TAB drivers. This reduces the thickness, weight and overall size of the display. The LVDS interface allows fast data transfer for 6-bit or 8-bit operation. The single tube CCFL backlight offers a very thin, low power, and bright display that can be dimmed to save power. This makes the display ideal for portable, battery-operated applications.

Features

- p-Si construction with drivers on glass
- High luminance
- Single CCFL backlight
- 6-bit (256K) or 8-bit (16.7M)
- Slim (5.2mm MAX) and lightweight design
- 10.4” XGA (1024 x 768 pixels color display)
- LVDS Interface system
- Applications: Notebook PC, Display Terminals; Scientific, Medical, Test & Measurement Instruments; Office Automation Equipment
