INTERFAN Offering New AC Fans at Lower Prices

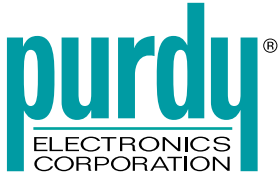

Sunnyvale, Calif., January 20, 2000 - INTERFAN today announced a new line of AC Fans which are at a reduced price versus current offerings. These top quality axial fans are certified by both UL and CUL. The sealed ball bearing construction ensures extended life and these parts come standard with locked rotor and polarity protection.

These AC Fans range in size from about 80 x 80 x 25mm to 172 x 150 x 51mm and generate airflow of 33 CFM up to 238 CFM. All frames are made of aluminum alloy and are industry standard frame sizes with industry standard mounting holes. All impellers are of reinforced plastic. Noise levels vary from size to size as does weight and all fans are certified to meet or exceed safety standards. Accessories are also available for these fans including finger guards and metal or plastic filters and custom cable and connector assemblies can also be created to suit individual needs

.Part Numbers for the INTERFAN AC Fan line include (115 and 230 volts AC at 50/60 MHz):

Product Name	Air Flow (CFM)	Frame Size
PM033-115-8025B-4	33	80 x 80 x 25 mm
